Amendments To The Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

Claim 1 (currently amended): A poker table comprising:

a tabletop defining an opaque, planar playing surface having a plurality of player stations and a dealer station;

one or more supports for supporting the tabletop in a horizontal position and at a predetermined height;

a translucent, planar light window, coplanar with the plane of the playing surface; and

a light source configured to project light upwardly through the light window;

wherein the light window extends substantially around the periphery of the playing surface.

Claim 2 (canceled).

Claim 3 (previously presented): The poker table as recited in claim 1, further including a trough rigidly secured to the underside of the tabletop, for carrying said light source, said light trough disposed at least partially beneath said playing surface.

Claim 4 (canceled).

Claim 5 (previously presented): The poker table as recited in claim 1, wherein said light window is disposed adjacent an outer edge of said playing surface.

Claim 6 (canceled).

Claim 7 (currently amended): ~~The A poker table as recited in claim 1, further including comprising:~~

a tabletop defining an opaque, planar playing surface having a plurality of player stations and a dealer station;
one or more supports for supporting the tabletop in a horizontal position and at a predetermined height;
a translucent, planar light window, coplanar with the plane of the playing surface;
a light source configured to project light upwardly through the light window; and
an arm rest extending substantially around the outer periphery of the light window.

Claim 8 (canceled).

Claim 9 (previously presented): A game table comprising:

a playing surface configured to be disposed at a predetermined height, wherein said playing surface defines one or more player stations and a dealer stations;
a light window disposed adjacent said playing surface, wherein said light window is disposed adjacent all of said one or more player stations;
a light source disposed beneath said light window for projecting light upward; and

a light trough rigidly secured to the underside of the playing surface for carrying said light source, said light source disposed at least partially beneath said light window, wherein said light trough is configured in a generally C-shaped cross-section defining first and second vertical risers and a connecting floor.

Claim 10 (previously presented): A game table as recited in claim 9, wherein said first vertical riser is securely fastened to the underside of the playing surface and located such that a portion of said light trough extends outwardly from an edge of said playing surface.

Claim 11 (previously presented): The poker table as recited in claim 3, wherein said trough is formed with one or more access holes.

Claim 12 (previously presented): The poker table as recited in claim 3, wherein said trough is formed with one or more vent holes.

Claim 13 (previously presented): The poker table as recited in claim 1, wherein said light source includes one or more fluorescent lights.

Claims 14-21 (canceled).

Claim 22 (previously presented): The poker table as recited in claim 7, wherein the arm rest includes:

a rigid plate extending around the periphery of the light window; and
a pad overlaying the upper surface of the rigid plate.

Claim 23 (previously presented): The poker table as recited in claim 22, wherein the pad comprises leather or vinyl.

Claim 24 (previously presented): The poker table as recited in claim 1, wherein the light window is formed of milk-colored plexiglas.

Claim 25 (previously presented): The poker table as recited in claim 1, wherein the tabletop includes a rigid base and a fabric pad overlaying the rigid base.

Claim 26 (previously presented): The poker table as recited in claim 1, wherein the light source is configured to be illuminated continuously.

Claim 27 (canceled).

Claim 28 (currently amended): The poker table as recited in claim [[27]] 1, wherein the light window extends around the entire periphery of the playing surface.

Claim 29 (previously presented): The poker table as recited in claim 28, wherein the light window has a generally oval shape.

Claim 30 (previously presented): The poker table as recited in claim 1, wherein the light window is discontinuous around the periphery of the playing surface.

Claim 31 (currently amended): A poker table comprising:

- a tabletop defining an opaque, planar, ~~generally oval shaped~~ playing surface having a plurality of player stations and a dealer station;
- one or more supports for supporting the tabletop in a horizontal position and at a predetermined height;
- an elongated light window extending around a substantial portion of the periphery of the ~~generally oval shaped~~ playing surface and past the plurality of player stations; and
- a light source configured to project light through the light window to the space above the playing surface.

Claim 32 (previously presented): The poker table as recited in claim 31, wherein the light window is planar and coplanar with the playing surface.

Claim 33 (previously presented): The poker table as recited in claim 32, further including an arm rest extending around the outer periphery of the light window.

Claim 34 (previously presented): The poker table as recited in claim 33, wherein the arm rest includes:

- a rigid plate extending around the outer periphery of the light window; and
- a pad overlaying the upper surface of the rigid plate.

Claim 35 (previously presented): The poker table as recited in claim 32, wherein the light window is translucent.
